IGIENE PER TUTTI

HYGIENE FOR EVERYONE

I bagni sono gli ambienti più favorevoli alla riproduzione dei microrganismi. Soprattutto nei vasi e nei lavandini vivono microbi come Salmonella ed E.Coli. Sebbene per la pulizia vengano utilizzati prodotti chimici aggressivi, non è facile creare ambienti igienici e salubri, perché questi detergenti chimici non possono rimuovere completamente i microbi dalla superficie e si moltiplicano rapidamente fino alla pulizia successiva. Pertanto, un bagno igienico è di grande importanza per la salute di tutta la famiglia. Seramiksán ora è al servizio di tutti i bagni e delle famiglie con una nuovissima tecnologia di superficie. Seramiksán Hygiene.

Bathrooms are the most favorable environments for the growth of microorganisms. Germs such as Salmonella, E. Coli are found especially in toilet bowls and sinks. Although strong chemicals are used for cleaning, it is not an easy task to create hygienic and healthy environments. Due to the fact that these chemical cleaners can not remove the microbes completely from the surface and in addition to this, microbes multiply rapidly until the next cleaning. Therefore, a hygienic bathroom poses a great importance for the whole family's health. Seramiksán is now at the service of all bathrooms and families with a brand new surface technology. Seramiksán Hygiene.

CI SIAMO ISPIRATI ALLA FORZA COMBATTIVA DELLA NATURA WE ARE INSPIRED BY THE STRUGGLE POWER OF NATURE

Progettato ispirandoci al viaggio emozionante e armonioso della goccia d'acqua, l'orinatoio Hill Smart integra il movimento fluido e sinuoso dell'acqua con il suo aspetto senza tempo e minimalista. Nell'orinatoio, i flussi d'acqua nella camera interna sono progettati per evitare completamente gli schizzi e per fornire facilità di flusso. Hill offre molto più di un orinatoio con le sue linee morbide e il design olistico, che fornisce facilità di flusso senza interferire con il flusso naturale dell'acqua con il suo serbatoio interno che impedisce gli schizzi d'acqua. Hill smart Urinal ha un design che supera le classiche difficoltà nella tecnica di produzione con la sua qualità di superficie liscia.

Designed by being inspired by the exciting, harmonious journey of the water drop, Hill Smart Urinal complements the fluid and curved movement of water with its timeless and minimalist appearance. Water flow in the inner chamber of the urinal have been designed to prevent splashing completely and facilitate flowing. Facilitating the flushing with its inner chamber that prevents splashing without interfering with the natural flow of water, Hill offers much more of a urinal with its soft lines and holistic design. We have added round lines in the Hill's design in order to highlight its naturalness in double or multiple montage. Hill Smart Urinal has a design overcoming the classical difficulties in the production technique.
